Professional Summary

Software developer with 3+ years of experience building scalable web applications using React, TypeScript, and Node.js. Proven track record of improving performance metrics, reducing load times, and delivering enterprise-grade solutions across ERP and automation platforms.

Technical Skills

Languages: JavaScript, TypeScript, PHP, SQL, PL/SQL, HTML, CSS, SASS
Frontend: React, Redux, Tailwind CSS, MUI, Shadcn, Bootstrap
Backend: Node.js, Express.js, MySQL, REST APIs
Tools & Platforms: Git, GitHub, n8n, Vite, Figma, WordPress, Supabase, Vercel, Render, Netlify

Relevant Experience

Software Developer • Sapper	May 2025 - Present
- Develop pixel-perfect React components from Figma designs for an accounts automation platform, implementing upload interfaces, multi-stage approval workflows, and real-time status tracking dashboards. - Build interactive dashboards displaying analytics and payment statuses, utilizing React hooks and state management for real-time data updates across user roles. - Collaborate with UX designers to translate wireframes into responsive, production-ready components ensuring consistent cross-device experience. - Optimize frontend performance for data-heavy dashboard views through lazy loading, code splitting, and efficient rendering strategies to handle large datasets seamlessly. - Implement RESTful API integrations and develop complex form interfaces with validation logic for data entry and editing, improving data accuracy and user input efficiency.	
Software Developer • SoftwareGen Technologies	July 2024 - January 2025
- Built and styled websites, designing systems and flows, and creating cross-platform digital experiences for a diverse range of clients using technologies such as React, JavaScript, HTML, CSS, SCSS, Tailwind CSS and Bootstrap, resulting in a 40% increase in client satisfaction. - Created designs using Figma and implemented them to deliver consistent user experiences across devices, resulting in a 30% improvement in overall UI quality and performance. - Performed quality assurance tests on sites to ensure cross-browser compatibility and mobile responsiveness, reducing user-reported issues by 20%. - Integrated analytics and tracking tools (Google Analytics, Tag Manager) to measure site performance, user behavior, and campaign effectiveness, collaborating with teams to optimize conversion funnels.	
Software Developer • Shrisoft System Solutions	October 2022 - June 2024
- Led front-end and backend development using a comprehensive tech stack, enhancing data retrieval efficiency and reducing front-end loading time by 40% through optimization techniques. - Developed and maintained RESTful APIs using Node.js and Express, integrating with MySQL databases to support ERP module functionality and improve data processing efficiency. - Streamlined development processes and presented technical solutions in client meetings, contributing to improved project delivery timelines and stakeholder satisfaction. - Contributed to an Enterprise Resource Planning (ERP) team, optimizing operational efficiency in CRM, Projects, and Procurement modules through feature enhancements and performance improvements.	

Projects

Jobs Board	Live Demo Github
Frontend and Backend Development • React, TypeScript, Vite, Tailwind CSS, Express, REST integrations. - Built a full-stack job aggregation platform using React, TypeScript, and Express that consolidates listings from multiple providers (Adzuna, SerpAPI, Remotive, Himalayas, JSearch) into a unified search experience with portal-specific filtering and navigation. - Implemented a secure Node.js/Express API layer with server-side API key management and CORS configuration, handling provider-specific constraints (Cloudflare proxying, asset handling) to deliver a responsive Tailwind UI.	
ShieldX	Live Demo Github
Frontend and Backend Development • React, TypeScript, Vite, Tailwind CSS, Express, REST, Supabase, Web Crypto API. - Developed a full-stack password manager with React 19, TypeScript, and Supabase, implementing JWT-based authentication, user-scoped access control, and client-side AES-GCM encryption with PBKDF2 key derivation (100k iterations). - Built vault CRUD operations with reveal/hide and lock/unlock flows, maintaining security separation between authentication, API access, and browser-based decryption with session-scoped keys.	

Education

Savitribai Phule Pune University (SPPU)	July 2019 - August 2022
Modern College of Arts, Commerce and Science, Ganeshkhind Pune Bachelor's Degree in Computer Science	

Certifications

Web Development
Core and Advanced Java
Structured Query Language (SQL)
